

ARAVIND PENTAPARTHI

Hyderabad | aravindpentaparthi@gmail.com | +91 9908924505 | [LinkedIn](#) | [GitHub](#)

Full-Stack Developer with hands-on industry experience at Infosys modernizing production systems; skilled in architecting and deploying scalable MERN applications integrated with Generative AI, backed by two national hackathon wins.

Skills

Languages:	Java, Python, JavaScript, TypeScript
Frontend:	React.js, Tailwind CSS, Next.js
Backend:	Node.js, Express.js, Redis
Machine Learning:	Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
Databases:	MySQL, MongoDB
Cloud:	AWS EC2, S3, Amplify, ECR, IAM
Tools & Practices:	Git, GitHub, Postman, Docker, GitHub Actions

Experience

Infosys | AI Intern

July 2025 – Oct 2025

- Developed a full-stack Node.js middleware to modernize a legacy IVR system, enabling dual-channel (DTMF & Speech) support for 10+ services.
- Designed a custom Natural Language Understanding (NLU) module from scratch to accurately recognize and route 10 distinct user intents.
- Refactored the application with centralized error handling and input validation, ensuring graceful failure across all service endpoints.
- Built a mobile-responsive web interface for executive reviews, reducing feedback cycles by 30% and streamlining project approvals.

Projects

RoleSync – Automated ATS & Job Matching Platform | [LINK](#)

MERN Stack, Redis, BullMQ

- Developed a full-stack ATS platform with candidate profile parsing, job match scoring, dual-role workflows, JWT authentication, RBAC, and CORS-secured API access.
- Improved API throughput by 60% and reduced response latency by 70% to less than 50ms using BullMQ, Redis background workers, and MongoDB aggregation pipelines.
- Deployed frontend on AWS Amplify, REST API on AWS EC2, AWS S3 for resume storage, and PM2 for process management, enabling independent frontend and backend scaling.

PlanX – AI-Powered Personal Finance Platform | [LINK](#)

MERN Stack, Gemini API, Chart.js

- Built and deployed a MERN finance platform on AWS EC2 with JWT auth, real-time dashboards across 10+ categories, cutting tracking effort by 40%.
- Integrated Gemini API with real-time financial data and isolated system prompts to deliver personalized budgeting insights.
- Automated CI/CD pipeline via GitHub Actions to build and push multi-stage Docker images to AWS ECR, configured Nginx reverse proxy with SSL, cutting deployment time by 60%.

Hackathons & Achievements

- 1st Prize – PROMETHEAN 2025 & ZIGNASA 2024:** Led end-to-end development of AR-based education platforms (MERN, Unity) securing 1st place among 200+ competing teams, managing design, development, testing, and deployment.

Certifications

Database Programming with SQL	Oracle
Supervised Machine Learning: Regression & Classification	Coursera
Full Stack Web Development	Udemy
Java Programming	NPTEL

Education

B.Tech in CSE (AIML), Vignan Institute of Technology & Science, CGPA: 8.63/10

Nov 2022 – Jul 2026

Intermediate, TSWRCOE, Percentage: 87.3%

Jun 2020 – Apr 2022
